Camp Program Act 4 Change from 15 to 19 October 2018

The camp proposed by Ecoline, with whom we have been working for several years, will be based on a new concept. Here is a first glimpse of what your children will be exploring throughout the week:

IN SUMMARY
A camp to give children the opportunity to contribute to today’s world and to invent that of tomorrow.

OBJECTIVES
Be aware of the challenges of tomorrow’s world and know that we can respond to them on a personal level. Each child will return from the camp with ideas and even concrete projects ready to be carried out if they so wish. Our message: it is possible!

PROGRAMME
4 axes:
- I (re)discover the challenges of today’s and tomorrow’s world through the United Nations Sustainable Development Goals (SDG)
- I invent or choose, alone or with others, solutions to meet these challenges
- I develop my creativity and skills to express my ideas, through manual arts and video
- I explore, through play, cooperation and peace (with myself, with others and with nature)

AGE
The camp is intended for children aged 9 to 12, whose parents work or study at EPFL or UNIL. It will take place on the EPFL site in Pavillon A.

PRICE
The weekly price (lunch, activities, equipment and travel included) is CHF 250.00 or CHF 215.00 for the second child.

MONITORS
4 to 5 adults involved in teaching and/or education
